PROPRIETOR'S PAGE

GREETINGS TO ALL—OLD FRIENDS AND NEW

Customers are not impersonal beings with us—here one day and gone the next. Instead, we like to think of them as friends to hold on to—people who love the same things we do, who love the beautiful in nature, who want to make some spot more attractive, whose likes are like our own. To want to please one's friends is natural. So it is with us—we want our customer-friends to be pleased with whatever they buy from us, be it something they come here and select, or something we send them. We want them to be satisfied. If, by chance, something they bought from us proves to be other than satisfactory, we want our customers to tell us so, and give us a chance to make things satisfactory. How else are we to know and how else can we continue to develop our ever-increasing business? Remember our motto—"When You are Satisfied, We are Satisfied."

Here they are, the five reasons why we appreciate your business—Ralph, Eleanor, between the twins Charles and Kenneth, and Arthur. This is the picture we said last year we hoped to show you in 1930. Now we hope you will like it.

FRUIT TREES

We sold one man 668 fruit trees in April, 1929. In spite of the excessively dry season which followed, 665 of these trees lived and made a satisfactory growth. better than 99.5 per cent. To-be-sure they were carefully and properly set out, but they had to be good trees to give results like this. Don't you think you, too, would do well to entrust your order to us, keeping your business in New England?

STRAWBERRIES

Every garden and farm should raise a good supply for use fresh and for canning. They make a very wonderful sauce or preserve. Incidentally, they are a profitable crop to raise for market. In planting, choose well-prepared ground, free from witch grass, and set the plants with the crown or bud just at the surface of the ground. Set the plants 1 ft. apart, with the rows at least 3 ft. apart.

Our plants are what we call "Good-as-Grow" Brand. Order early and set as early as possible. Please specify if we may substitute, if sold out of any variety ordered.

RHUBARB ROOTS, "PIE PLANT"

20c each; \$1.50 for 10. By mail, 25c each; \$1.75 for 10.

Linnaeus. The standard large, early variety for home or market.

Rhubarb is a good spring tonic. It is easy to raise, and any surplus may be canned for winter use as sauce or for pies.

ASPARAGUS ROOTS

Every gardener and farmer should raise his own asparagus, even if all he has is a few plants in a row alongside the vegetable garden, out of the way of the plow, but where the wheel-harrow can be run over them in early spring. Asparagus should be set only on well-prepared ground which is free from witch grass. Ordinarily we recommend spring planting for asparagus. We have, however, at least one customer-friend who has set the roots in the fall with good success, and we should like to

hear from others who have tried fall-planting. Upon request we will gladly mail more complete instructions on starting an Asparagus Bed.

The best variety of all is Mary Washington. Consequently we are raising only this variety. Why not plant the best and why not let us fill your order with fresh-dug roots at reasonable prices?

GLADIOLAS

Any good garden soil will raise good "Glads" if you plant good bulbs. Set the bulbs stem-end up, from three to five inches apart and four to six inches deep, covering them gradually as the tops come up through the soil (as in planting asparagus roots). Deep planting prevents the flowers from falling over and makes staking unnecessary. At least fifty days are required from planting to blooming. For a succession of blooms, do not plant all bulbs at one time.

Experiments at Cornell show that best results are secured with gladiolas when the bulbs are procured not very far away—which is another good reason why you may well get your bulbs from us, here in the heart of New England.

In cutting blooms use a sharp knife and leave at least two or three leaves on the plant.

When the leaves turn brown in the fall, lift the bulbs, dry them in the sun, and after removing the old shrivelled bulb, store in a cool dry place where they cannot freeze.

The following varieties are some of the most beautiful. They will delight the eye and gladden the heart of any flower-lover. —**Please Order Early.**

For a ready-mixed assortment, we especially recommend the following:

Exonian Mixture. A good assortment of beautiful varieties. 50c per doz. 50 bulbs for \$1.00. \$2.00 per 100. (Postage prepaid).

FALL PLANTING

Each Fall the number and volume of our sales exceeds that of the preceeding Fall. Of course Fall is the season to plant the bulbs which give so much pleasure in the Spring, (tulips, crocuses, etc.), and the best time to set peonies, as well as a good time to plant many other things. For a list of what you can plant in the Fall see the following, and see our Special Fall Planting Circular which will be ready in the summer.

What you don't plant this Spring, plant in the Fall, and send your order to us.

BEARDED IRISES

Commonly, though erroneously, called German Iris.

These May-flowering, vigorous-growing plants thrive in well-drained sunny spots. See them in bloom and you will know at once why they are increasing in popularity each year. In planting, barely cover the roots, and mulch the first fall to prevent heaving.

Iris may be transplanted in the Spring, in the Summer or in the Fall,—in short almost any time when the ground is not frozen.

Our stock of Iris is large, and a visit to our nurseries at blossoming time will well repay any who like to see them in bloom. We shall be pleased to have you call.
